Top European Quality

- Engineering decades of experience and know-how at your service. Ready to tackle any challenge.
- Premium components each system is built to last, and all parts are available world wide.
- Follow up sale Support excellent service Has always been the key to our success.
- Cost-Value ratio the best in class...

Cutting-Edge Automation for Cutlery

CUTLERY

At SWITEK, innovation is our trademark. We are proud to offer cutlery manufacturers outstanding automation solutions.

Incorporating various automation technologies while drawing from our team's vast experience; place SWITEK among the world's leading manufacturers for Cutlery automation.

SWITEK designs and builds each system to perform efficiently and reliably for many years. While taking into consideration floor space, mold, injection machine and other variables we bring to our customer the benefits of a complete automated system with a ready to market product in the highest sanitary standards.

When considering integrating a cutlery automation system with an existing or new injection machine, Intervention time is a major consideration. SWITEK's solutions allow the lowest intervention time without compromising reliability and efficiency.
